

Cortex XDR

Secure every endpoint and reduce your risk with a prevention-first approach

What is Cortex XDR?

Cortex XDR sets a new standard in **Extended Detection and Response (XDR)** solutions, offering comprehensive **protection, detection, investigation, and response** capabilities.

It collects and analyzes data from **endpoints, networks, cloud, identity, and third-party security tools** to provide complete visibility, detect threats faster, and help security teams respond quickly from a single platform.

Differentiation

Cortex XDR vs. SentinelOne

Feature	Cortex XDR	SentinelOne Singularity
1. Data Correlation	✅ Correlates telemetry from endpoints, network, cloud, identity, and third-party tools to provide a complete attack story.	⚠️ Primarily focuses on endpoint telemetry, with additional integrations available for extended visibility.
2. Prevention-First Security	✅ Prevention-first approach with exploit prevention, malware prevention, ransomware protection, and behavioral AI before execution.	✅ Strong AI-based detection and behavioral protection with emphasis on autonomous response.
3. Native AI-Driven SOC Platform	✅ Native integration with Cortex XSIAM for AI-driven SIEM, SOAR, automation, and unified SOC operations.	⚠️ Supports integrations, but typically requires additional tools for full SIEM/SOC capabilities.
4. Investigation Experience	✅ Automatically groups related alerts into a single incident with the complete attack timeline.	✅ Provides detailed endpoint investigation and Storyline™ analysis.
5. Threat Intelligence	✅ Native Unit 42 Threat Intelligence continuously enriches detections and prevention.	⚠️ Uses proprietary threat intelligence with optional external integrations.
6. Enterprise Security Platform	✅ Fully integrated with NGFW, Prisma Cloud, Cortex XSIAM, Unit 42, and the Palo Alto Networks ecosystem.	⚠️ Integrates with multiple third-party security products through an open ecosystem.

Cortex XDR vs. CrowdStrike

Feature	Cortex XDR	CrowdStrike Falcon
1. Unified Data Sources	✓ Correlates endpoint, network, cloud, identity, and third-party telemetry for complete attack visibility.	⚠ Primarily endpoint-focused with additional modules and integrations for extended visibility.
2. Prevention-First Security	✓ Prevents exploits, malware, ransomware, and fileless attacks before execution using AI-driven prevention.	✓ AI-powered prevention with strong behavioral detection capabilities.
3. Native AI-Driven SOC	✓ Native integration with Cortex XSIAM for AI-driven SIEM, SOAR, automation, and SOC operations.	⚠ Advanced SOC capabilities require additional Falcon modules and licensing.
4. Alert Correlation	✓ Automatically correlates related alerts into a single incident with a complete attack timeline.	⚠ Provides detailed detections, with incident correlation enhanced through additional workflows and modules.
5. Palo Alto Ecosystem Integration	✓ Native integration with NGFW, Prisma Cloud, Unit 42, Cortex XSIAM, and Cortex XSOAR .	⚠ Strong third-party integrations through the Falcon ecosystem.
6. Enterprise Security Platform	✓ Unified Palo Alto Networks platform integrating NGFW, Prisma Cloud, Cortex XSIAM, Unit 42, and Cortex XDR .	⚠ Broad security platform with additional modules for expanded capabilities.

Cortex XDR: The world's most effective endpoint security, proven by 6 years of MITRE ATT&CK results

Prevention-first approach stops threats pre-impact and reduces risk

Rich context and advanced AI enables high-accuracy detection, investigation, and remediation

Single agent architecture on a unified data lake decreases operational overhead

Endpoint security must evolve to a new standard

Today's Endpoint Security Challenges

Lets too many threats in

Ineffective prevention overwhelms analysts from the start

Burns cycles with low-context alerts

Analysts spend valuable time connecting the dots, delaying response

High cost and complexity

Existing tools are siloed with high operational overhead

What's Needed for Modern Endpoint Security

Prevents advanced threats in **real-time**

Detects with **unmatched accuracy** and cuts **response time to minutes**

Improves **operational efficiency** with a single data foundation for the SOC

Prevention-first approach stops threats pre-impact and reduces risks

Backed by the massive scale of Palo Alto Networks—70K+ customers in every industry—we uncover the latest threats and train the AI in the XDR agent

The XDR agent prevents sophisticated threats in real-time and pre-execution to reduce the risk of a breach

To ensure business continuity, our prevention capabilities are rigorously tested for safe deployment and work with high-efficacy out of the box

Single Agent

Reduces complexity and cost

Rich Context

Delivers best-in-class detection accuracy, proven by MITRE

Unified Data Lake

Sets the foundation for complete SOC transformation with XSIAM

The Human-Centered SOC Architecture Doesn't Work

Impossible to have real-time responses for all incidents with current tool stack

Every tool was built to perform one function.

No holistic end-to-end management of detection, investigation, and response.

Teams try to solve for highest-priority issues

~11K¹ ALERTS PER DAY

~93%² SOCS STILL DEPENDENT ON MANUAL PROCESSES

~23%³ ALERTS GET IGNORED / NOT INVESTIGATED

Sources:

SOC Challenges are Compounded by the Advent of Adversarial AI

Adversaries are using AI to launch faster, broader and more effective cyberattacks

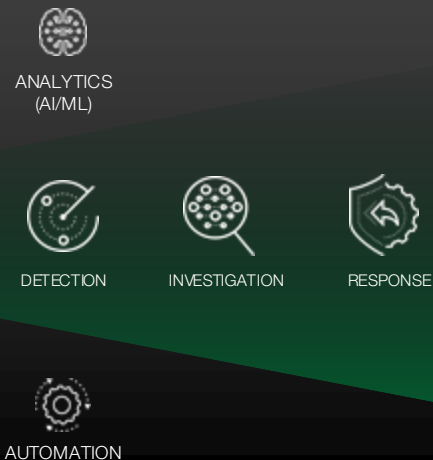

Move at Machine-Speed with AI and Automation

Massive data enhanced with stitching and correlation dramatically reduces the # of alerts

Machines automate detection, investigation, and response and make recommendations

Empowered analysts become more proactive

Top 10 Market Share Vendors

North Dakota IT easily scales endpoint footprint by 12x with no additional staff

RESULTS

12x

Scaled from 20K to 250K endpoints without increasing security staff

99.6%

Decrease in open alerts, from 16,000 before Cortex XDR to ~50

Minutes

To find a true positive with Unit 42 MTH vs. weeks previously

CHALLENGE

- + Unify over 600 state entities using siloed security tooling and processes
- + Enable both broad and granular visibility of threats—statewide or at level of a single entity

SOLUTION

Endpoint strategy accelerates security response, optimizes IT spend

- Cortex XDR®
- Unit 42® Managed Threat Hunting
- Unit 42® Retainer

NORTH
Dakota | Information Technology
—Be Legendary™

We had a vision to build, manage and maintain the best state cyber operations center in the United States. Working with Palo Alto Networks, we've been able to bring that forward.”

Michael Gregg
Chief Information Security Officer
North Dakota IT

What a Cortex XDR deployment looks like

Deploy the Unified Agent

- Replace traditional endpoint & cloud runtime solutions with one lightweight agent
- No reboots required
- Out-of-the-box policy delivers optimal protection with no tuning

Install in minutes

Connect Key Data Sources

- Ingest rich endpoint data
- Add cloud, network, and identity sources for comprehensive visibility
- Automatically stitch all data together to enable real-time analytics and automation

Start detecting immediately

Investigate & Respond

- XDR groups alerts into cases - 98% fewer alerts to triage
- Use playbooks, automation rules, and analyst-led action to respond
- Leverage 24/7 expert-led MDR to manage cases and respond for you

Triage less, respond faster

We know upgrading endpoint security can be hard

Most EPP vendors
**missed > 50% of
attacks** in MITRE evals¹

Upgrading
endpoint agents
can take months

Organizations
pay 2x while contracts
overlap

¹MITRE ATT&CK Evaluations: Enterprise Round 6

We'll cover the time and cost challenges of upgrading

Endpoint Security Upgrade Offer

Easily upgrade your agents and pay nothing until your current contract ends

Up to 18 months of
Cortex XDR at **no cost**

Professional services
migration at **no cost**

Managed Endpoint Security Upgrade Offer

Easily upgrade your agents and pay nothing until your current contract ends - with 24/7 MDR

Up to 18 months of Cortex XDR
and Unit 42 MDR at **no cost**

Professional services
migration at **no cost**

Available to qualifying customers with over 3K endpoints and a 3-year commitment
